GOOD REASONS TO PURCHASE HKS ATTACHMENTS

Our attachments increase the cost-effectiveness of your excavator

With an attachment by HKS, you can move your attachment tools into many new operating positions. Only the attachment pivots or rotates to position the tool, not your excavator. This prevents site damage and saves fuel.

Durable quality and reliability are a given!

We manufacture our attachments in our own facility. This way, we maintain control over quality and ensure that you get a durable product. In addition, our attachments are "Made in Germany" with German quality and the greatest precision.

Good service for your satisfaction

Our service team provides on-site support everywhere in Germany. In addition, we have a global partner network that can help you if you have problems.

Technically innovative and solution-oriented

The connections between our attachments and your excavators and quick couplers are customized. Each dipperstick connection is produced for optimum kinematics and to ensure the greatest tear strength and breakaway torque.

Consistent performance ensures smooth operation

Even after many operating hours, the pivot force remains constant and consistent. Neither adjustments nor lubrication are necessary. Save downtime and costs.
